

Guide for COVID Business Screening

You focus on your job, we'll take care of this part.

WHAT IS INCLUDED:

A qualified health care professional with experience in COVID-19 screening meets your employees at the door to take their temperature and ask the most up-to date government required screening questions.

Non-contact thermometer and PPE for screener is provided. Documentation of screening is provided to business through technology or paper copy, whichever works best for your business.

Give you and your employees peace of mind that proper precautions are being followed by an objective third party.
